National Time & Signal

The versatility of the 901 Series Fire Alarm continues with a variety of box configurations. Surface mount and flush mount versions share a common back box. Flush door/trim units are available for single box or dual box configurations. The dual box configuration allows a pair of boxes to be connected without space between to simplify installation. Window and solid doors are interchangeable. Doors and trims are reversible to hinge left or right.

Single Flush Mount Cabinet
The trim overhangs back box 1" on all sides. Trim mounts to hinge left or right. Window or solid door available.
Shown: A901-BOX-SINGLE-F-W

Dual Flush Mount Cabinets
Each Door and Trim are separate. Each overhangs its box 1" on three sides allowing boxes to be mounted together. Solid and window doors interchangeable.
Shown: A901-BOX-DUAL-F-WS

Surface Mount Cabinets
With no door overhang, boxes may be mounted together or separate. Window and solid doors are interchangeable and reversible to hinge either side.
Shown: A901-BOX-SINGLE-S-W and A901-BOX-SINGLE-S-S
